

INBORN ERRORS OF DEVELOPMENT

*The Molecular Basis of Clinical Disorders
of Morphogenesis*

Second Edition

Edited by

Charles J. Epstein, M.D.

Robert P. Erickson, M.D.

Anthony Wynshaw-Boris, M.D., Ph.D.

OXFORD
UNIVERSITY PRESS
2008

Contents

Contributors xxiii

I GENERAL CONCEPTS

1. Human Malformations and Their Genetic Basis 3
Charles J. Epstein
2. Principles of Differentiation and Morphogenesis 9
Scott F. Gilbert
3. Model Organisms in the Study of Development and Disease 25
Ethan Bier and William McGinnis
4. Consequences of the Genome Project for Understanding Development 49
Leena Peltonen

II PATTERNS OF DEVELOPMENT

5. Developmental Origins of the Mammalian Body Plan 57
Angela J. Villar and Stephanie M. Ware
6. Neural Crest Formation and Craniofacial Development 69
*Kurt A. Engleka, Deborah Lang, Christopher B. Brown, Nicole B. Antonucci,
and Jonathan A. Epstein*
7. Development of the Nervous System 79
John L.R. Rubenstein and Luis Puelles
8. Development of the Eye 94
Joe Rainger, Veronica van Heyningen, and David R. FitzPatrick
9. Development of the Ear 107
Donna M. Fekete
10. Molecular Regulation of Cardiogenesis 124
Vishal Nigam and Deepak Srivastava
11. Development of the Vascular System 130
Carmen M. Barnes, Emily R. Christison-Lagay, Sui Huang, and Arja Kaipainen

CONTENTS

12. Muscle and Somite Development <i>Douglas Anderson, Jerry M. Rhee, and Alan Rawls</i>	150
13. The Development of Bone and Cartilage <i>Shunichi Murakami, Haruhiko Akiyama, and Benoit De Crombrughe</i>	162
14. Development of the Limbs <i>Sahar Nissim</i>	182
15. The Sex Determination Pathway <i>Robert P. Erickson</i>	203
16. Development of the Kidney <i>Mita M. Shah, Dylan L. Steer, Derina E. Sweeney, and Sanjay K. Nigam</i>	212
17. Development of the Endodermal Derivatives in Lung, Liver, Pancreas, and Gut <i>Ben Z. Stanger</i>	229
18. Development of Epidermal Appendages: Teeth and Hair <i>Atsushi Ohazama and Paul T. Sharpe</i>	245

III DEFINED PATHWAYS

Part A. The Sonic Hedgehog Signaling Pathway

19. The Sonic Hedgehog Signaling Pathway <i>Philip Iannaccone, Robert Holmgren, Marilyn L.G. Lamm, Sara Ahlgren, Olga Lakiza, Joon Won Yoon, and David Walterhouse</i>	263
20. <i>DHCR7</i> and the Smith–Lemli–Opitz (RSH) Syndrome and Cyclopamine Teratogenesis <i>Mira Irons</i>	280
21. <i>SHH</i> and Other Genes and the Holoprosencephaly Malformation Sequence <i>Jill A. Helms, Samantha Brugmann, and Dwight R. Cordero</i>	291
22. <i>IHH</i> and Acrocapitofemoral Dysplasia and Brachydactyly A1 <i>Jan Hellemans and Geert R. Mortier</i>	301
23. <i>PTCH</i> and the Basal Cell Nevus (Gorlin) Syndrome <i>Ervin Epstein, Jr.</i>	306
24. <i>GLI3</i> and the Pallister–Hall and Greig Cephalopolysyndactyly Syndromes <i>Leslie G. Biesecker</i>	313
25. <i>SALL1</i> and the Townes–Brocks Syndrome <i>Jürgen Kohlhase</i>	322

Part B. The Wnt (Wingless-type) Signaling Pathway

26. The Wnt Signaling Pathway <i>Lorna S. Kategaya, Laird C. Sheldahl, and Randall T. Moon</i>	330
27. <i>WISP3</i> and Progressive Pseudorheumatoid Dysplasia <i>Wafaa Suwairi and Matthew L. Warman</i>	336
28. <i>AXIN2</i> , Tooth Agenesis, and Colorectal Cancer <i>Pekka Nieminen, Laura Lammi, and Heikki J. Järvinen</i>	340
29. <i>WNT3</i> and Tetra-amelia <i>Stephan Niemann</i>	344
30. <i>ROR2</i> and Brachydactyly Type B and Recessive Robinow Syndrome <i>Andrew O.M. Wilkie</i>	350

Part C. The Transforming Growth Factor- β (TGF- β) Signaling Pathway

31. An Introduction to TGF- β -related Signaling 358
Veronica Descotte, Michael B. O'Connor, and Joy Jadrich
32. *NOG* and Proximal Symphalangism (SYM1), Multiple Synostosis (SYN1), Tarsal-Carpal Coalition, and Isolated Stapes Ankylosis 369
Stefan Mundlos
33. *ZIC3*, *CFC1*, *ACVR2B*, and *LEFTY2* and the Visceral Heterotaxies 373
Stephanie M. Ware and John W. Belmont
34. *GDF5* (*CDMP1*) and Chondrodysplasia (Grebe, Hunter-Thompson, and Du Pan Types), and Brachydactyly, Type C 382
Michael W. Kilpatrick and Petros Tsipouras
35. *ENG*, *ACVRL1*, and *SMAD4* and Hereditary Hemorrhagic Telangiectasia (Osler-Weber-Rendu Syndrome) 388
Sudha Srinivasan, Jonathan N. Berg, and Douglas A. Marchuk
36. *RUNX2* and Cleidocranial Dysplasia 399
Patricia Fonseca, Brendan Lee, and Dobrawa Napierala
37. AMH/MIS and Its Receptors: The Persistent Müllerian Duct Syndrome 406
Jean-Yves Picard
38. *LEMD3* and Osteopoikilosis, the Buschke-Ollendorff Syndrome and Melorheostosis 411
Jan Hellemans and Geert R. Mortier
39. *TGFBR 1/2* and Loeys-Dietz Syndrome 417
Bart L. Loeys and Harry C. Dietz
40. *ZEB2* and Mowat-Wilson Syndrome 425
Meredith Wilson, Michel Goossens, Florence Dastot-Le Moal, and David Mowat

Part D. The Tumor Necrosis Factor Signaling Pathway

41. Signaling by TNF and Related Ligands 433
Pascal Schneider
42. *EDA*, *EDAR*, and *EDARADD* and the Hypohidrotic Ectodermal Dysplasias and the Ectodysplasin Signaling Pathway 442
Jonathan Zonana

Part E. The Fibroblast Growth Factor Signaling Pathway

43. Molecular and Cellular Biology of FGF Signaling 449
David Givol and Veraragavan P. Eswarakumar
44. FGF Receptor Mutations: Bone Dysplasia, Craniosynostosis, and Other Syndromes 461
Andrew O.M. Wilkie
45. *FGF10*, *FGFR2*, and *FGFR3* and the Lacrimo-Auriculo-Dental-Digital (LADD) Syndrome 471
Jeff M. Milunsky
46. *TWIST1* and the Saethre-Chotzen Syndrome 474
Ethylin Wang Jabs
47. *KALI*, *FGFR1*, *PROKR2*, and *PROK2* and Kallmann Syndrome 482
Jean-Pierre Hardelin and Catherine Dodé
48. *TEK* (*TIE2*) and Cutaneomucosal Venous Malformation 491
Vinciane Wouters, Laurence M. Boon, John B. Mulliken, and Mükka Vikkula

49. *FLT4 (VEGFR3)* and Milroy Disease 495
Robert E. Ferrell and David N. Finegold

Part F. The Glial Cell–Derived Neurotrophic Factor Signaling Pathway

50. Signaling Pathways of Glial Cell–Derived Neurotrophic Factor 499
Louis F. Reichardt
51. *RET* and Hirschsprung Disease and Multiple Endocrine Neoplasia Type 2 512
Andrew S. McCallion and Aravinda Chakravarti

Part G. The Endothelin Signaling Pathway

52. Introduction to Endothelin-3/Endothelin-B Receptor and *SOX10* Signaling Pathways 521
Cheryl E. Garipey
53. *EDNRB*, *EDN3*, and *SOX10* and the Shah–Waardenburg Syndrome (WS4) 530
Joke B.G.M. Verheij and Robert M.W. Hofstra

Part H. The Notch Signaling Pathway

54. Introduction to Notch Signaling 536
Alison Miyamoto and Gerry Weinmaster
55. *JAG1* and *NOTCH2* and the Alagille Syndrome 552
Nancy B. Spinner and Ian D. Krantz
56. *DLL3*, *MESP2*, and *LFNG* and Spondylocostal Dysostosis 560
Peter D. Turnpenny, Kenro Kusumi, and Sally Dunwoodie

Part I. The P13K-LKB1 Pathway

57. The P13K-LKB1 Pathway 573
Reuben J. Shaw and Lewis C. Cantley
58. *PTEN* and the Cowden and Bannayan–Riley–Ruvalcaba Syndromes 580
Kevin M. Zbuk and Charis Eng
59. *STK11 (LKB1)* and Peutz–Jeghers Syndrome 589
Stylianos E. Antonarakis
60. *TSC1* and *TSC2* and Tuberous Sclerosis 594
David J. Kwiatkowski

Part J. The RAS Pathway

61. The RAS Pathway 605
Jeffrey Swensen and David Viskochil
62. *NF1* and Neurofibromatosis 1 615
Girish C. Dagnakatte and David H. Gutmann
63. RAS Signaling Defects and Noonan Syndrome 620
Marco Tartaglia and Bruce D. Gelb
64. *HRAS* and Costello Syndrome 632
Yoko Aoki and Yoichi Matsubara
65. The RAS/MAPK Pathway and the Cardio–Facio–Cutaneous Syndrome 639
Katherine A. Rauen
66. *RASA1* and Capillary Malformation–Arteriovenous Malformation 647
Nicole Revencu, Laurence M. Boon, John B. Mulliken, and Miikka Vakkula

IV GENE FAMILIES NOT YET IN PATHWAYS

Part A. The Homeobox Gene Family

67. The Role of <i>Hox</i> and <i>Dlx</i> Gene Clusters in Evolution and Development <i>Frank H. Ruddle</i>	653
68. <i>HOXA1</i> and the Bosley–Salih–Alorainy and Athabascan Brainstem Dysgenesis Syndromes <i>Max A. Tischfield and Elizabeth C. Engle</i>	659
69. <i>HOXA11</i> and Amegakaryocytic Thrombocytopenia with Radioulnar Synostosis <i>Amy E. Geddis</i>	668
70. <i>HOXA13</i> and the Hand–Foot–Genital and Guttmacher Syndromes <i>Jeffrey W. Innis</i>	670
71. <i>HOXD10</i> and Congenital Vertical Talus <i>Antony E. Shrimpton and E. Mark Levinsohn</i>	682
72. <i>HOXD13</i> and Synpolydactyly <i>Frances R. Goodman and Peter J. Scambler</i>	689
73. <i>EMX2</i> and <i>HESX1</i> and Type I Schizencephaly and Septo-Optic Dysplasia <i>Daniel Kelberman and Mehul T. Dattani</i>	697
74. <i>PDX1</i> and Pancreatic Agenesis and Type 2 Diabetes <i>Melissa K. Thomas and Joel F. Habener</i>	710
75. <i>MSX1</i> and Partial Anodontia and the Witkop Syndrome <i>Marie-José H. Van Den Boogaard</i>	717
76. <i>MSX2</i> and <i>ALX4</i> and Craniosynostosis and Defects of Skull Ossification <i>Ulrich Müller</i>	730
77. <i>SHOX</i> and Dyschondrosteosis and Turner Syndrome <i>Jay W. Ellison</i>	735
78. <i>HLXB9 (MNX1)</i> and Sacral Agenesis and the Currarino Syndrome <i>Stephen Scherer, Guiseppe Martucciello, Elena Belloni, and Michele Torre</i>	740
79. <i>EYA1</i> and the Branchio–Oto–Renal Syndrome <i>Fowzan S. Alkuraya, Robert T. Moy, and Richard L. Maas</i>	747
80. <i>PITX2</i> and <i>PITX3</i> and the Axenfeld–Rieger Syndrome, Peters, Anomaly, Anterior Segment Ocular Dysgenesis, Ring Dermoid of the Cornea, Posterior Polar Congenital Cataract (CPP4), and Microphthalmia with Neurologic Impairment <i>Elena V. Semina</i>	757
81. <i>NKX2-5</i> and Congenital Heart Disease <i>Avihu Z. Gazit, Susan N. Foerster, and Patrick Y. Jay</i>	768
82. <i>LMX1B</i> and the Nail Patella Syndrome <i>Roy Morello, Jennifer N. Lenington, and Brendan Lee</i>	778
Part B. The Paired-Box (PAX) Gene Family	
83. Introduction to Paired-Box Genes <i>Petros P. Petrou and Peter Gruss</i>	787
84. <i>PAX2</i> and the Renal–Coloboma Syndrome <i>Michael R. Eccles</i>	796
85. <i>PAX3</i> and Waardenburg Syndrome Type 1 <i>Gareth N. Corry and D. Alan Underhill</i>	803
86. <i>PAX6</i> and Aniridia and Related Phenotypes <i>Veronica van Heyningen and Kathleen Williamson</i>	809

87. <i>PAX9</i> and Hypodontia <i>Pragna I. Patel and Donald T. Brown</i>	818
Part C. The Forkhead Gene Family	
88. Introduction to Forkhead Genes <i>Naoyuki Miura, Xiaodong Xue, and Tatsuo Itakura</i>	826
89. <i>FOXC1</i> and <i>FOXL2</i> and the Axenfeld–Rieger Malformations and the Blepharophimosis, Ptosis, and Epicanthus Inversus Syndrome <i>Ramsey A. Saleem, Fred B. Berry, Lijia Huang, and Michael A. Walter</i>	834
90. <i>FOXC2</i> and Lymphedema Distichiasis <i>Robert P. Erickson</i>	841
91. <i>FOXE1</i> and Choanal Atresia, Cleft Palate, and Thyroid Agenesis <i>Mireille Castanet and Michel Polak</i>	846
Part D. The T-Box Gene Family	
92. Introduction to the T-Box Genes and Their Roles in Developmental Signaling Pathways <i>Virginia E. Papaioannou and Sarah N. Goldin</i>	852
93. <i>TBX1</i> and the DiGeorge Syndrome Critical Region <i>Scott E. Klewer, Raymond B. Runyan, and Robert P. Erickson</i>	862
94. <i>TBX3</i> and <i>TBX5</i> and the Ulnar–Mammary and Holt–Oram Syndromes <i>Michael J. Bamshad and Lynn B. Jorde</i>	867
95. <i>TBX22</i> and X-Linked Cleft Palate and Ankyloglossia <i>Erwin Pauws and Phillip Stanier</i>	878
Part E. The SOX Gene Family	
96. The <i>SOX</i> Genes in Development and Disease <i>Brett Hosking and Peter Koopman</i>	883
97. <i>SOX2</i> and Malformations of the Eye, Brain, Foregut, and Male Genital Tract <i>David R. FitzPatrick</i>	894
98. <i>SOX3</i> and Infundibular Hypoplasia <i>Daniel Kelberman and Mehul T. Dattani</i>	901
99. <i>SOX9</i> and Campomelic Dysplasia and Sex Reversal <i>Sahar Mansour</i>	907
100. <i>SOX18</i> and the Hypotrichosis–Lymphedema–Telangiectasia Syndrome <i>Arash Ghalamkarpour, Koen Devriendt, and Miikka Vakkula</i>	913
V PROCESSES	
Part A. Regulation of Chromatin Structure and Gene Expression	
101. Mechanisms of Regulated Gene Transcription <i>Kristen Jepsen, Valentina Perissi, Victoria Lunyak, Michael G. Rosenfeld, and Christopher K. Glass</i>	919
102. <i>CBP (CREBBP)</i> and the Rubinstein–Taybi Syndrome <i>Fred Petrij, Dorien J.M. Peters, Raoul C.M. Hennekam, and Rachel H. Giles</i>	925
103. <i>ATRX</i> and the X-Linked α -Thalassemia Mental Retardation Syndrome <i>Richard J. Gibbons and Takahito Wada</i>	943
104. <i>IGF2</i> , <i>H19</i> , <i>p57^{KIP2} (CDKN1C)</i> , and <i>LIT1 (KCNQ1OT1)</i> and the Beckwith–Wiedemann Syndrome <i>Michael R. DeBaun and Andrew P. Feinberg</i>	955

105. 15q11-13 and the Prader–Willi Syndrome <i>Shawn E. McCandless and Suzanne B. Cassidy</i>	965
106. <i>DNMT3B</i> and the Immunodeficiency–Centromeric Instability–Facial Anomalies Syndrome <i>Déborah Bourc'his, Françoise Ledeist, and Evani Viegas-Péquignot</i>	974
107. <i>RSK2 (RPS6KA3)</i> and the Coffin–Lowry Syndrome <i>Maria Zeniou, Sylvie Jacquot, Jean-Pierre Delaunoy, and André Hanauer</i>	978
108. <i>BCOR</i> and the Oculofaciocardiodental Syndrome <i>Emma Hilton, Graeme G.M. Black, and Vivian Bardwell</i>	987
109. <i>CHD7</i> and the CHARGE Syndrome <i>Joris A. Veltman and Conny M.A. van Ravenswaaij-Arts</i>	995
110. <i>CTDPI</i> and Congenital Cataracts Facial Dysmorphism Neuropathy (CCFDN) Syndrome <i>Luba Kalaydjieva and Rebecca Gooding</i>	1003
111. <i>ESCO2</i> and Roberts Syndrome <i>Miriam Gordillo, Hugo Vega, and Ethylin Wang Jabs</i>	1011
112. <i>NIPBL</i> and <i>SMC1L1</i> (now <i>SCM1A</i>) and the Cornelia de Lange Syndrome <i>Matthew A. Deardorff and Ian D. Krantz</i>	1020
113. <i>NSD1</i> and Sotos Syndrome <i>Remco Visser and Naomichi Matsumoto</i>	1032
Part B. Transcription Factors	
114. <i>MITF</i> and the Waardenburg Type II and Albinism–Deafness (Tietz) Syndromes <i>Thomas J. Hornyak, Nancy M. Chung, and Masayoshi Tachibana</i>	1038
115. <i>POU3F4</i> and Mixed Deafness with Temporal Bone Defect (DFN3) <i>Frans P.M. Cremers, Cor W.R.J. Cremers, and Hannie Kremer</i>	1042
116. <i>TFAP2B</i> and the Char Syndrome <i>Sindhu Veetil and Bruce D. Gelb</i>	1048
117. <i>GATA3</i> and Hypoparathyroidism, Deafness and Renal Disease <i>R.V. Thakker</i>	1055
118. <i>FOG-2</i> (now <i>ZFPM2</i>) and <i>GATA-4</i> and Congenital Heart Disease and Diaphragmatic Hernia <i>Anne M. Slavotinek</i>	1061
119. <i>IRF6</i> and the Van der Woude and Popliteal Pterygium Syndromes and the Risk for Nonsyndromic Cleft Lip and Palate <i>Brian C. Schutte, Michael J. Dixon, and Jeffrey C. Murray</i>	1069
120. <i>PTF1A</i> and Pancreas and Cerebellar Agenesis <i>Jayne A.L. Minton and Andrew T. Hattersley</i>	1073
121. <i>RAI1</i> and the Smith–Magenis and Potocki–Lupski Syndromes <i>Weimin Bi and James R. Lupski</i>	1078
122. <i>SALL4</i> and the Okihira/Duane Radial-Ray and Acro–Renal–Ocular Syndromes <i>Jürgen Kohlhase</i>	1089
123. <i>TCF2 (HNF-1β)</i> and <i>MODY5</i> and Urogenital Malformations <i>Oddmund Søvik, Jørn V. Sagen, and Pål R. Njølstad</i>	1096
124. <i>ZIC1</i> and <i>ZIC4</i> and the Dandy–Walker Malformation <i>Kathleen J. Millen, Inessa Grinberg, Marissa Blank, and William B. Dobyns</i>	1103
(see also Chapter 171, <i>TRPS1</i> and the Tricho–Rhino–Phalangeal Syndromes)	

Part C. RNA Localization and Control of Activity

125. Posttranscriptional Control: Nuclear RNA Processing 1108
Maurice S. Swanson and John P. Aris
126. *FMRI* and the Fragile X Syndrome 1126
Kathryn B. Garber, Daniel Gruskin, and Stephen T. Warren
127. *TCOF1* (*Treacle*) and the Treacher Collins Syndrome 1133
Jill Dixon, Paul A. Trainor, and Michael J. Dixon
128. *RMRP* and Cartilage-Hair Hypoplasia 1142
Pia Hermanns, Bernhard Zabel, and Brendan Lee

Part D. Posttranslational Control and Ubiquitination

129. An Introduction to Posttranslational Control by Ubiquitin-Dependent Proteolysis 1148
Peter K. Jackson
130. *UBE3A* and the Angelman Syndrome 1161
Lowell Rayburn and Joseph Wagstaff
131. *VHL* and von Hippel-Lindau Disease 1168
Eamonn R. Maher
132. *MKKS* and the McKusick-Kaufman and Bardet-Biedl Syndromes 1173
Leslie G. Biesecker
133. *PQBPI* and the Renpenning, Sutherland-Haan, Golabi-Ito-Hall, and Hamel Cerebropalatocardiac and XLMR Syndromes and Nonsyndromic XLMR 1177
Charles Schwartz
134. *TBCE* and the Hypoparathyroidism-Retardation-Dysmorphism (HRD) Syndrome 1186
George A. Diaz, Ruti Parvari, and Eli Hershkovitz
135. *UBR1* and the N-end Rule Pathway and the Johanson-Blizzard Syndrome 1190
Martin Zenker
136. *CUL7* and the 3M Syndrome 1195
Céline Huber and Valérie Cormier-Daire

Part E. Cell Cycle, Proliferation, and Apoptosis

137. An Introduction to the Mechanisms of Cell Cycle Regulation and Apoptosis 1201
Katrien Vermeulen, Dirk R. Van Bockstaele, Viggo F.I. Van Tendeloo, and Zwi N. Berneman
138. *MYCN* and the Feingold Syndrome 1212
Hans van Bokhoven and Han G. Brunner
139. *LMNA* and *LBR* and the Hutchinson-Gilford Progeria Syndrome and Associated Laminopathies 1219
Leslie B. Gordon, W. Ted Brown, and Frank G. Rothman
140. Fanconi Anemia 1230
Henri J. van de Vrugt and Markus Grompe
141. *RECQL4* and the Rothmund-Thomson, RAPADILINO, and Baller-Gerold Syndromes 1237
Lionel Van Maldergem, H. Annika Siitonen, Ethylin Wang Jabs, and Miriam Gordillo
142. *Tp63* and the Ectodermal Dysplasia, Ectrodactyly, and Cleft Lip and/or Palate (EEC), Limb-Mammary (LMS), Ankyloblepharon, Ectrodactyly, and Cleft Lip/Palate (AEC, Hay-Wells), and Acro-Dermato-Ungual-Lacrimal-Tooth (ADULT), and Rapp-Hodgkin Syndromes and Ectrodactyly (Split Hand/Foot Malformation) 1246
Michael J. Bamshad

Part F. Guanine Nucleotide–Binding Proteins

143. An Introduction to Guanine Nucleotide–Binding Proteins 1258
Sarah E. Newey and Linda Van Aelst
144. *GNAS* and McCune–Albright Syndrome/Fibrous Dysplasia, Albright Hereditary Osteodystrophy/Pseudohypoparathyroidism Type IA, Progressive Osseous Heteroplasia, and Pseudohypoparathyroidism Type IB 1277
Lee S. Weinstein
145. *FGDI* and Faciogenital Dysplasia (Aarskog–Scott Syndrome) 1289
Jerome L. Gorski
146. *RAB3GAP1* and *RAB3GAP2* and the Warburg Micro and Martsolf Syndromes 1299
Irene Aligianis and Eamonn R. Maher
147. *NPR2* and Acromesomelic Dysplasia, Type Maroteaux 1304
Matthew L. Warman and Robert C. Olney
148. *GPR56* and Bilateral Frontoparietal Polymicrogyria 1309
Xianhua Piao and Christopher A. Walsh

Part G. Microtubule Motors, Cilia, and Cytoskeleton

149. Microtubule Motors: Intracellular Transport, Cell Division, Ciliary Movement, and Nuclear Migration 1313
Yong-Ha Youn, Tiziano Pramparo, and Anthony Wynshaw-Boris
150. *LISI* and *DCXI* and Classical Lissencephaly 1322
Joseph G. Gleeson
151. Lissencephaly with Cerebellar Hypoplasia 1334
Eric C. Olson and Christopher A. Walsh
152. *DNAH5* and Primary Ciliary Dyskinesia (Kartagener Syndrome) 1338
Michal Witt
153. *FLNA* and *FLNB* and Periventricular Nodular Heterotopia, the Otopalatodigital Spectrum Disorders, Spondylocarpotarsal Synostosis, Larsen Syndrome, and Atelosteogenesis Types I and III 1350
Stephen P. Robertson and Deborah Krakow
154. The Molecular Basis of Joubert Syndrome and Related Disorders 1361
Michael R. Zimbric and Joseph G. Gleeson
155. The Bardet–Biedl Syndromes 1371
Val C. Sheffield, Qihong Zhang, Elise Heon, Edwin M. Stone, and Rivka Carmi
156. The Molecular Basis of Oral-Facial-Digital Type I (OFDI) Syndrome 1379
Brunella Franco
157. *MKS* Genes and the Meckel Syndrome 1387
Marjo Kestilä and Leena Peltonen

Part H. Vesicle-Mediated Trafficking and Endocytosis

158. Inborn Defects of Membrane Trafficking 1392
Elina Ikonen
159. *VPSI3B* and the Cohen Syndrome 1400
Forbes D.C. Manson, Kate E. Chandler, and Graeme G.M. Black
160. *SNAP29* and Cerebral Dysgenesis, Neuropathy, Ichthyosis, and Palmoplantar Keratoderma Syndrome 1407
Hannah Mandel, Eli Sprecher, Debora Rapaport, and Mia Horowitz

161.	<i>VPS33B</i> and the Arthrogyryposis, Renal Dysfunction, and Cholestasis Syndrome <i>Paul Gissen and Eamonn R. Maher</i>	1410
162.	<i>SEC23A</i> and Cranio-Lenticulo-Sutural Dysplasia <i>Simeon A. Boyadjiev</i>	1416
<i>Part I. Extracellular Matrix</i>		
163.	Extracellular Matrix and Signaling during Development <i>Scott B. Selleck and Sally E. Stringer</i>	1424
164.	<i>GPC3</i> and the Simpson–Golabi–Behmel Syndrome <i>Scott Saunders, Rick A. Martin, and Michael R. Debaun</i>	1430
165.	<i>HSPG2</i> and the Schwartz–Jampel Syndrome and Dyssegmental Dysplasia, Silverman–Handmaker Type <i>Sophie Nicole, Morgane Stum, and Bertrand Fontaine</i>	1435
166.	<i>LICAM</i> and X-Linked Hydrocephalus <i>Connie Schrandt-Stumpel and Jean-Pierre Fryns</i>	1443
167.	<i>COMP</i> and Pseudoachondroplasia <i>Matthew J. Rock and Daniel H. Cohn</i>	1447
168.	<i>MMP2</i> and the Multicentric Osteolysis, Nodulosis, and Arthropathy (MONA) and Winchester Syndromes <i>Rebecca A. Mosig, Oonagh Dowling, and John A. Martignetti</i>	1453
169.	<i>ADAMTS10</i> and the Weill–Marchesani Syndrome <i>Carine Le Goff, Nathalie Dagonneau, and Valérie Cormier-Daire</i>	1463
170.	<i>FRAS1</i> and <i>FREM2</i> and the Fraser Syndrome <i>Ian Smyth and Peter J. Scambler</i>	1466
171.	<i>TRPS1</i> and the Tricho-Rhino-Phalangeal Syndromes <i>Hermann-Josef Lüdecke and Bernhard Horsthemke</i>	1470
<i>Part J. Guidance Molecules</i>		
172.	<i>EFNB1</i> and <i>EFNA4</i> in the Craniofrontonasal Syndrome and Craniosynostosis <i>Stephen R.F. Twigg and Andrew O.M. Wilkie</i>	1476
<i>Part K. Junctions, Transporters and Channels</i>		
173.	<i>GJA1</i> (Connexin 43) and the Oculodentodigital Syndrome <i>Rebecca J. Richardson and Michael J. Dixon</i>	1483
174.	<i>KCNJ2</i> and the Andersen–Tawil Syndrome <i>David R. Renner, Rabi Tawil, Martin Tristani-Firouzi, and Louis J. Ptáček</i>	1490
175.	<i>ANKH</i> and Craniometaphyseal Dysplasia <i>Peter Nürnberg and Sigrid Tinschert</i>	1497
VI DYSMORPHIC DISEASE GENES OF UNKNOWN FUNCTION OR UNCLASSIFIED		
176.	<i>LMBR1</i> and Acheiropodia and Preaxial Polydactyly <i>Petros Tsiouras and Michael W. Kilpatrick</i>	1507
177.	<i>NR0B1</i> (<i>DAX1</i>) and X-linked Adrenal Hypoplasia Congenita and XY Sex Reversal <i>Eric Vilain and Edward R.B. McCabe</i>	1513

178. <i>EVC</i> and <i>EVC2</i> and the Ellis–van Creveld Syndrome and Weyers Acrofacial Dysostosis <i>Marzena Galdzicka, Janice A. Egeland, and Edward I. Ginns</i>	1524
179. P450 Oxidoreductase Deficiency and the Antley–Bixler Syndrome <i>Walter L. Miller</i>	1531
