

Instituto Nacional de Saúde  
Doutor Ricardo Jorge

## DOCTORAL Fellow Position FOR CLINICIANS

Laboratório de Proteómica, Departamento de Genética, Instituto Nacional de Saúde Dr Ricardo Jorge, INSA-I.P.- Lisboa

To collaborate in the project: “**TRANSLATING BIOMARKER RESEARCH FINDINGS INTO THE CLINIC**”

*The present project is aimed at bringing together expertises in clinical practices and CLINICAL PROTEOMICS RESEARCH to evaluate and validate disease biomarkers findings to the clinical application.*

A doctoral fellow position is open to MEDICAL DOCTORS, preferentially with clinical knowledge in physiology, pathophysiology or internal medicine. The applicant should work well as part of a group and be able to develop independent contributions.

To apply please send your CV and names of 2 references by email application, no later than **10<sup>th</sup> August 2010**, to:

Deborah Penque at [deborah.penque@insa.min-saude.pt](mailto:deborah.penque@insa.min-saude.pt)

Note: The pre-selected candidate (after CV evaluation and interview) will be instructed to apply her/his individual application to [doctoral grants of Fundação para a Ciência e a Tecnologia](#) (deadline **5 p.m, 6<sup>th</sup> September**). These FCT grants target holders of a university degree who are accepted as doctoral students in a Portuguese or foreign university. The final decision for grant attribution will be thus of FCT responsibility according to its pre-defined criteria. The fellowship is for one year renovated for 6 years in total, starting in January 2010.
